Objetivos de aprendizagem (conhecimentos, aptidões e competências a desenvolver pelos estudantes)

O objetivo da UC para o segundo semestre consiste no desenvolvimento de um projeto autoral na área do design de moda que tenha como objetivo responder de uma forma criativa a assuntos relacionados com os skills próprios de cada aluno e ao mesmo tempo sempre apoiado

por um pensamento sustentável, ético e colaborativo.

Conteúdos Programáticos / Programa

Desenvolvimento de um projeto envolvendo todas as suas múltiplas fases aplicando a metodologia do Design thinking com respetiva prototipização. Este projeto único e individual terá um calendário sub-dividido por 6 (seis) fases.

No final do semestre haverá uma apresentação pública deste projeto e a respetiva entrega do portfólio, com todos os elementos necessários ao longo do processo.

Demonstração da coerência dos conteúdos programáticos com os objectivos de aprendizagem da unidade curricular

- consolidar a capacidade de gestão do trabalho ao longo do processo criativo, até ao desenvolvimento do protótipo;
- utilizar ferramentas digitais e analógicas que visem o cumprimento dos propósitos dos projectos em decurso;
- desenvolver capacidades de transformação de ideias bidimensionais em formatos 3D, tendo em vista a adequação dos recursos utilizados no âmbito do projecto
- adequar os princípios e elementos de design à criação de uma linguagem própria nesta área de conhecimento.
- Entendimento do pensamento ético e sustentável como base da geração de novos produtos.

Metodologias de ensino (avaliação incluída)

Avaliação contínua com enfoque em momentos de resposta focada a exercícios ou projetos.

Avaliação qualitativa ao longo das 6 (seis) fases do projeto.

Avaliação final.

Demonstração da coerência das metodologias de ensino com os objetivos de aprendizagem da unidade curricular

- flexibilidade e capacidade de adaptação a condições não expectáveis e ao trabalho colaborativo
- capacidade de comunicação a diversos níveis (verbal, escrita, gráfica e digital)
- autonomia no desenvolvimento de uma linguagem autoral
- responsabilidade perante os desafios e o desenvolvimento do trabalho.

Learning objectives (knowledge, skills and competences to be developed by students)

The objective of this curricular unit is the development of an authorial fashion design project, that aims to respond, in a creative way to a sustainable, ethical and collaborative development thinking, to the students own skills.

Syllabus

Development of a project involving all its multiple phases applying the Design Thinking methodology with the respective prototyping. This unique and individual project will have a calendar sub-divided into 6 (six) phases.

At the end of the semester there will be a public presentation of this project and the respective delivery of the portfolio, with all the necessary elements throughout the process.

Demonstration of the syllabus coherence with the curricular unit's learning objectives

- consolidate work management capacity throughout all the creative process, including prototype development;
- utilization of digital and analogue tools that aim to fulfill the purposes of the ongoing projects;
- development of the ideas transforming capacities two-dimensional into 3D formats, always adapting the resources used within the project;
- adapt the principles and design elements to the creation of a specific language in this area of knowledge;
- Understanding ethical and sustainable thinking as the basis for the generation of new products.

Teaching methodologies (including evaluation)

Continuous assessment with emphasis on moments of focused response to exercises or projects.

Qualitative assessment throughout the 6 (six) phases of the project.

Final evaluation.

Demonstration of the coherence between the Teaching methodologies and the learning outcomes

- flexibility and ability to adapt to unexpected conditions and to collaborative work
- ability to communicate at different levels (verbal, written, graphic and digital)
- autonomy on the development of an authorial language
- responsibility before every challenge and on the work development.
